Cross Cutting Themes National Cancer Survivorship Initiative

Safe Risk Stratification
Lead: Prof Mike Hawkins / Dr Adam Glaser
To develop a model for identifying levels of care for Children and Young People Cancer Survivors according to their risk of late effects

CYP Evidence Review
Lead: Dr Adam Glaser and Dr Bob Philips
To systematically examine published evidence in relation to the most effective model of follow-up care

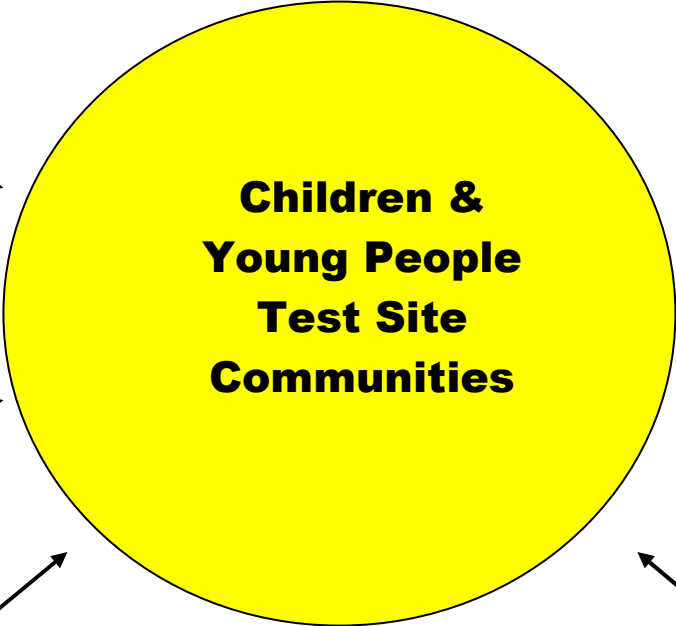

Nurse Competencies
Lead: Dr Diana Greenfield
To determine what core competencies nurses require to meet the needs of children and young people living with and beyond cancer

Pan Thames - Model of Care
Lead: Dr Gill Levitt
Work to develop a Late Effects Clinic - Model of Care

Evaluation Exercise
Lead: Prof Faith Gibson
Our aim is to use a multi-model and multi-method approach to evaluation that will be fully reflective of the CYP testing, the feasibility of rolling-out improvements and the actual difference made to patients in the service being provided.

Sharing of learning and Progress
Lead: Judi Tapp
Sharing of good practice via NHS Improvement website and Service Improvement Advisory network

Lost to Follow up
Lead: Dr Andy Toogood
Identify the risk factors of patients becoming lost to follow-up and the impact of being outside of specialist service

Children & Young People Test Site Communities
